Re: CC Docket No. 96-128, Response to Request for Information

Dear Mr. Caton:

Pursuant to a verbal request from Craig Stroup of the Common Carrier Bureau, BellSouth is providing the attached data regarding payphone messages and smart payphone sets.

The messages summarized here by carrier PIC, by year, by quarter represent BellSouth Public Communications' (BSPC's) estimated completed calls from its smart payphones and therefore does not reflect any traffic/messages that other payphone providers may have generated from their payphones located in the territory served by BellSouth. These messages exclude inmate and 0+ calls and are the result of applying various timing algorithms to different call types in an attempt to estimate "Completed" calls.

These messages do not reflect all attempts from BSPC's payphones, but represent only those calls that passed BSPC's criteria for estimating "completed" calls. BSPC also processed these messages through a carrier validation process in an attempt to determine the first carrier to receive the call from the network interface.

BSPC does not have any means for identifying the existence or absence of the coding digit for these calls. The carrier's PIC is shown based on BSPC's records indicating the carrier to whom the call was switched. BSPC has not attempted to group the various PICs of a given carrier together due to the many different consolidations/mergers of various interexchange carriers.

Please include this submission in the record in the above referenced proceeding. If you have any questions, please call me.

Yours truly,

W. W. Jordan
